Hyderabad, Telangana – 500058

PROFESSIONAL SUMMARY

Software Developer with experience in backend development using Node.js and REST APIs. Strong understanding of object-oriented programming concepts through Java training, along with hands-on experience in database management and API integration. Proven ability to translate requirements into working features, collaborate in Agile teams, and continuously learn new technologies.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript

Backend: Node.js, Express.js, Spring Boot

Frontend: React (Basic), HTML, CSS

APIs: REST API design

Databases: PostgreSQL, MySQL

Tools: Git, VS Code, Eclipse

Concepts: OOP, SDLC

Practices: Agile/Scrum, debugging, code validation

PROFESSIONAL EXPERIENCE

Software Developer | Amigo Techno Park

June 2025 – Present

- Engineered backend modules in Node.js/Express handling 3+ RESTful endpoints per feature, reducing manual data-fetch time by ~30% for internal ops team.
- Converted 8 functional requirement documents into production-ready backend logic, achieving zero critical defects at UAT sign-off.
- Diagnosed and resolved 15+ bugs across backend services by applying structured root-cause analysis, cutting average resolution time from 2 days to 4 hours.
- Maintained living technical documentation for all code changes, enabling new team members to onboard 50% faster.
- Collaborated in daily standups and sprint reviews within a 5-member team, delivering features on time across 4 consecutive sprints.

PROJECTS

Hospital Management System

Spring Boot + React + PostgreSQL

- Developed a full-stack hospital management system handling patient workflows, appointments, and user management
- Built REST APIs using Spring Boot for authentication, patient data, and appointment scheduling
- Designed and implemented React-based UI modules including dashboard, booking system, and profile management
- Integrated frontend with backend APIs, ensuring smooth data flow and handling async states effectively
- Implemented role-based access control (Admin, Doctor, Patient) with protected routes
- Structured database schema in PostgreSQL for scalable and efficient data handling
- Debugged and resolved integration issues across frontend and backend layers
- Followed modular architecture, improving maintainability and feature scalability

TRAINING

Java Developer Trainee - 360 Digrii

- Completed hands-on training in Core Java, JDBC, and SQL
- Built backend modules and practiced debugging and testing techniques
- Learned structured coding practices and application development fundamentals

EDUCATION

Master of Business Administration (Finance)	2022
Sri Indu P.G College 6.59 CGPA	
Bachelor of Commerce (Computers)	2020
Arunodaya Degree College 7.83 CGPA
